

South Florida

Premier Eye Care for Your Best-Ever Vision

Exacting standards and the most advanced technology and techniques make this South Florida eye center the go-to practice for patients seeking surgically improved vision.

Braverman Eye Center has provided South Florida residents with an exceptional level of overall eye care for more than 37 years. The practice is a premier provider of LASIK eye surgery, cataract surgery, presbyopic (aging eye) lens exchange, and premium lens implant technology.

"Ours was the first practice in the Broward County/Ft. Lauderdale area to perform LASIK with the Excimer laser, and we also introduced the Femto LDV™ Femtosecond Surgical Laser to the South Florida area, allowing us to perform all-laser, blade-free LASIK procedures that are more advanced technology than procedures performed with the bladed microkeratome," Dr. Stanley Braverman informs.

Braverman Eye Center also offers the highly regarded WaveLight® Allegretto Wave® Eye-Q Laser system for less induced higher-order vision aberrations, achieving more customized vision correction than is possible with eyeglasses, contacts, or even traditional LASIK.

"Not every patient is a good candidate for LASIK," Dr. Braverman points out. "We offer other options for patients whose refractive error is too pronounced, who lack the proper corneal thickness for LASIK, or who have dry eyes or other ocular conditions.

"We also offer *Bioptics* as another tool: it combines procedures when a single option doesn't yield the desired level of vision correction."

Replacing Natural Lenses

Whether a patient has developed cataracts or opts for lens exchange,

Braverman Eye Center offers a full range of premium intraocular lenses to bring the world back into focus—at any distance.

From accommodating lenses that mechanically restore adjustable focus, to those that improve night vision, enhance clarity for outdoor activities, or restore sharp near vision, Braverman Eye Center has the lens and the surgical technique to provide predictable results.

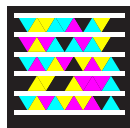

Meeting All Needs

Braverman Eye Center's team of board-certified and fellowship-trained eye physicians and surgeons provides a wide range of subspecialty expertise in such demanding areas as glaucoma management, oculoplastic surgery, neuro-ophthalmology, corneal transplantation, and treatment of retinal disorders, including macular degeneration, diabetic retinopathy, and retinal detachment.

The team includes Stanley Braverman, MD, FACS; Eric F. Ciliberti, MD, MS; Ashley Cowart, OD; Ryan Hargreaves, OD; Alan S. Lane, MD, FACS; Tirso Lara, MD, FACS; Jesse Pelletier, MD, FACS; Kevin Stewart, MD, FACS; Rashid Taher, MD, FACS; and David Tenzel, MD, FACS.

Stanley Braverman, MD, FACS, medical director and founding partner of the Braverman Eye Center, is a board-certified ophthalmologist with a distinguished career in the full range of laser vision correction techniques. An active medical researcher, he is the inventor of several ophthalmic surgical instruments. Dr. Braverman has authored a chapter for an authoritative book on small incision cataract surgery as well as many medical journal articles. He is a peer reviewer for the prestigious *American Journal of Ophthalmology* and is a Voluntary Assistant Clinical Professor at the University of Miami's Bascom Palmer Eye Institute, where he teaches advanced techniques in cataract surgery to resident eye surgeons.
